SMOOTHEST CHOCOLATE MILK

NATURAL BOOST

There is nothing like a fresh and creamy glass of a chocolate malt milk drink to keep you charged all day.

Ask any culinary expert for her secret to great tasting food, and the answer you're most likely to receive is "fresh ingredients". When it comes to choosing premium dairy products, it is important to know how fresh they are, and where they come from.

The secret behind Greenfields Chocolate Malt Milk Beverage's smooth, velvety texture and rich, creamy taste is its fiercely-guarded source – the company's own Holstein cows. The animals are cared for at an integrated dairy farm in the highlands of Malang, East Java; the same place where the milk is prepared and packed to the strictest standards.

For all-natural freshness, Greenfields ensures that its milk is free of chemicals, antibiotics and hormones. Prepared in a tightly controlled and hygienic environment to keep contaminants at bay, the milk is pasteurised only once. This not only helps it to retain its nutrients, but also enhances its great-tasting, natural flavour.

A rich source of electrolytes, proteins and carbohydrates, Greenfields Chocolate Malt Milk Beverage provides both young and old with an instant energy boost – especially at breakfast and after working out.

Besides Chocolate Malt, Greenfields milk is available in Full Cream, Low Fat and Skimmed flavours at all major supermarkets. Visit www.greenfieldsmilk.com or www.facebook.com/GreenfieldsMilkSG for more information.
